3.2.5 Social Protection, including Safety Net Programs	0	A recent review of SPPIS across African nations, categorized Togo as having an 'early stage or no plans' for a national safety net system.	Monchuk, Victoria. 2013. Reducing Poverty and Investing in People: The New Role of Safety Nets in Africa. Washington, DC: World Bank.
3.2.6 Early Childhood Development	1	The government of Togo is currently elaborating a multisectoral ECD policy, but ensuring the support of all relevant ministries remains a challenge. Budget allocations for ECD are insufficient, and coordination is lacking between sectors in implementing interventions. Both administrative (e.g. annual census) and survey data are collected; the collection of administrative data could be improved. Togo does not have a centralized system for collecting and analyzing administrative data on young children. Each of the relevant ministries manages its own data collection system. Administrative data are collected on child protection through TogoInfo.
