

COUNTRY DASHBOARD

Country A

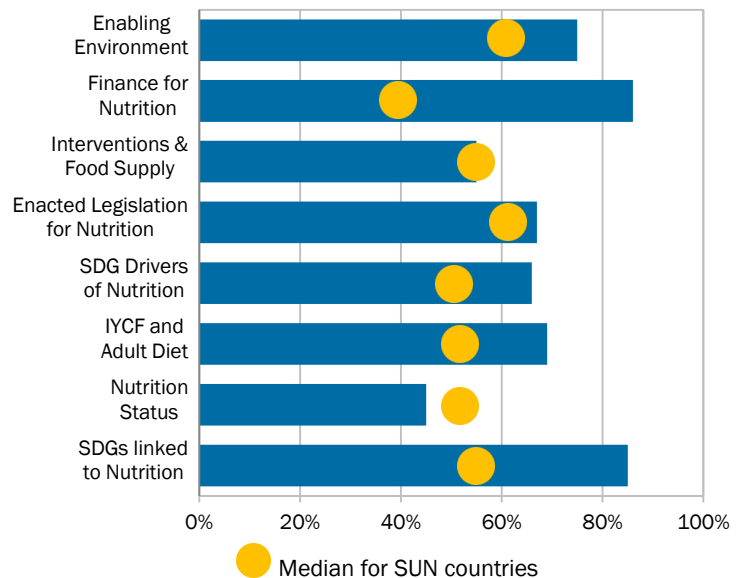

COUNTRY A

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Country A are available for 72/78 (92%) indicators mostly covering the timeframe 2011-2016. Based on the data, Country A is progressing relatively well with strong performance in the enabling environment, finance for nutrition, underlying drivers for nutrition, and nutrition-related SDG's, as well as some progress in the nutrition status of children. However, more could be done for food supply where data is lacking and scaling up high impact interventions to address the excessive burdens of under-nutrition, especially underweight and anaemia among women and low birth weight, stunting and wasting among children.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
