

COUNTRY DASHBOARD

Burkina Faso

BURKINA FASO

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Burkina Faso are available for 76/79 (96%) indicators mostly covering the timeframe 2010-2016. Based on the data, Burkina Faso is progressing well with strong performance in legislation and the enabling environment (with success in mobilizing high level advocates) as well as good coverage of some nutrition interventions. However, more could be done for diversifying food supply, improving child and adult diets and addressing underlying drivers of nutrition to reduce the high burden of malnutrition, especially among women. Low performance of nutrition-related SDGs is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
