

COUNTRY DASHBOARD

Burundi

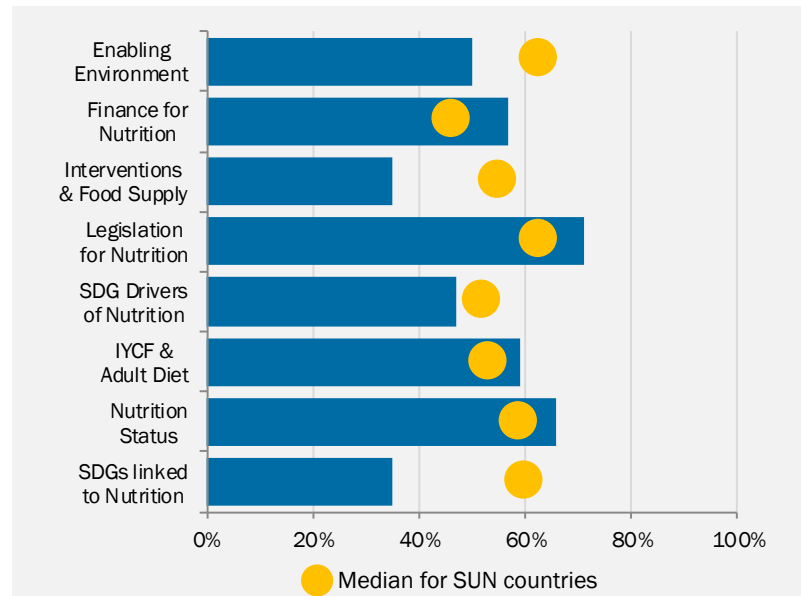

BURUNDI

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Burundi are available for 68/79 (86%) indicators mostly covering the timeframe 2006-2016. Based on the data, Burundi is progressing relatively well with strong performance in legislation (especially regarding food fortification), as well as high coverage for breastfeeding and moderate levels of undernutrition, with the exception of high U5 stunting. More could be done for improving the enabling environment particularly with regard to inclusion of nutrition targets in plans as well as increasing coverage of health interventions and data availability for key nutrition and food security indicators.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
