

COUNTRY DASHBOARD

Cambodia

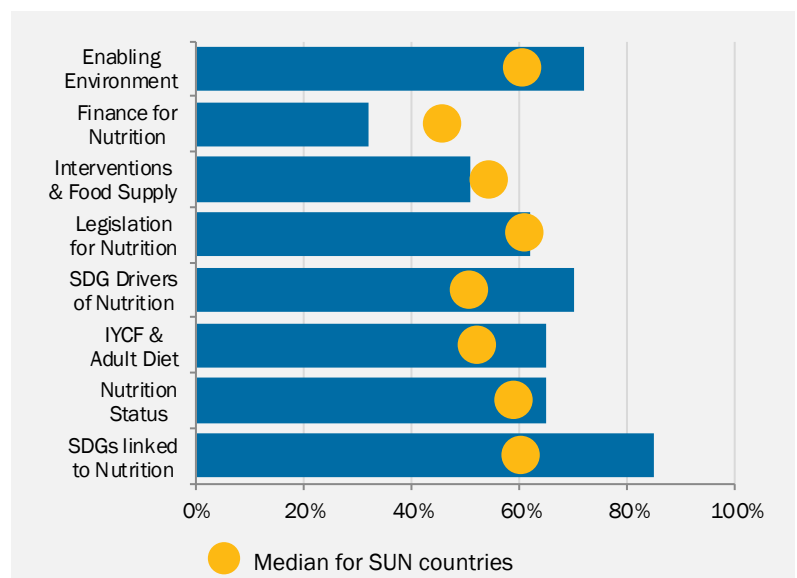

CAMBODIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Cambodia are available for 72/79 (91%) indicators mostly covering the timeframe 2011-2016. Based on the data, Cambodia is progressing relatively well with strong performance in the enabling environment and nutrition-related SDGs, and good performance in the underlying drivers of nutrition and uptake of IYCF and dietary behaviours. However, more could be done on the finance for nutrition (where data is missing), the food supply, and to address the high prevalence of child stunting and both undernutrition and anemia among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
