

COUNTRY DASHBOARD

Congo

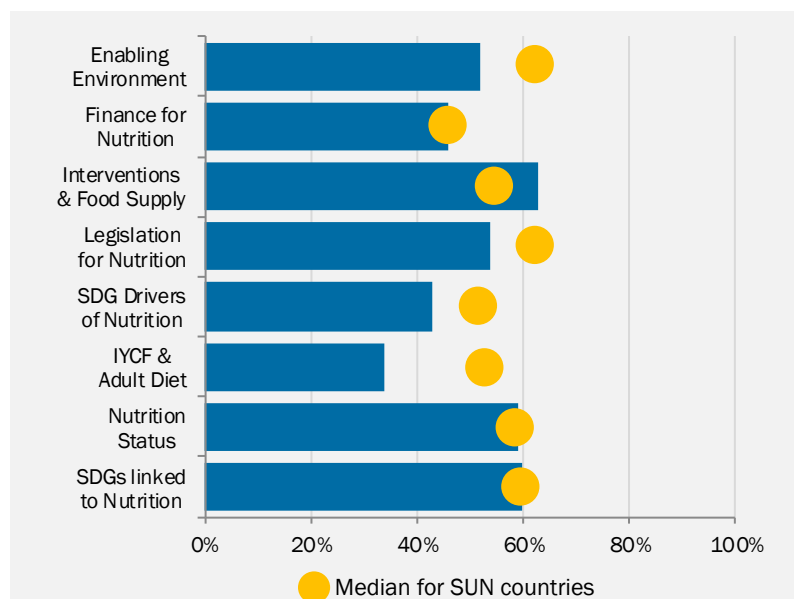

CONGO

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Congo are available for 69/79 (87%) indicators mostly covering the timeframe 2011-2016. Based on the data, Congo is progressing well with moderate performance in the enabling environment, intervention coverage, legislation for nutrition and the nutrition-related SDGs. However, more could be done on finance for nutrition (where data is largely missing), underlying drivers of nutrition such as access to basic sanitation and addressing the IYCF and dietary intake behaviours to address the burden of malnutrition, particularly among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
