# Côte d'Ivoire

## COTE D'IVOIRE

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Côte d'Ivoire are available for 74/79 (94%) indicators mostly covering the timeframe 2008-2016. Based on the data, Côte d'Ivoire is progressing relatively well with strong performance in the enabling environment (especially regarding the presence of networks and SUN-related processes), and legislation for nutrition (notably maternity protection, and food fortification). However, more could be done to increase domestic finance, scaling up high-impact interventions (including uptake of IYCF) and address gender-related issues to reduce undernutrition among children and anaemia as well as diet-related NCD among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
