

COUNTRY DASHBOARD

Gabon

The MEAL Results Framework identifies a wide range of desired results and associated indicators of progress across various domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

GABON

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Gabon are available for 59/79 (75%) indicators mostly covering the timeframe 2010-2016. Based on the data, Gabon is progressing relatively well with moderate performance in interventions and food supply, legislation (especially the enactment of the BMS code and maternity protection), as well as child stunting and wasting. However, more could be done for the enabling environment and finance for nutrition (where considerable data is missing). A high prevalence of anemia, diabetes, overweight and obesity among women is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
