

COUNTRY DASHBOARD

Guinea

GUINEA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Guinea are available for 70/79 (89%) indicators mostly covering the timeframe 2012-2016. Based on the data, Guinea is progressing with strong performance in the enabling environment (especially mobilizing high level advocates and performing relatively well in SUN processes), and legislation for nutrition (with notable achievements including maternity protection and food fortification). However, more could be done on finance for nutrition (where considerable data gaps exist), scaling up high-impact nutrition interventions and improving child feeding behaviours to address child stunting, anaemia and overweight/obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
