

COUNTRY DASHBOARD

Indonesia

INDONESIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Indonesia are available for 73/79 (92%) indicators mostly covering the timeframe 2012-2016. Based on the data, Indonesia is progressing relatively well with strong performance in the enabling environment, legislation, underlying drivers of nutrition, and uptake of IYCF and dietary behaviours, as well as some progress in the nutrition status of children. However, more could be done for donor nutrition financing, and scaling up high impact interventions and food supply to address the double burden of under-nutrition and overweight/obesity among children and women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
