

COUNTRY DASHBOARD

Myanmar

MYANMAR

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Myanmar are available for 68/79 (86%) indicators mostly covering the timeframe 2007-2016. Based on the data, Myanmar is progressing relatively well with strong performance in the enabling environment, high impact interventions and food supply, and underlying drivers of nutrition as well as the nutrition status of children. However, more could be done for addressing the issue of missing data for indicators related to finance for nutrition, uptake of IYCF and dietary behaviours, and the nutrition-related SDGs. A high prevalence of underweight and anaemia among women is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
