

COUNTRY DASHBOARD

Namibia

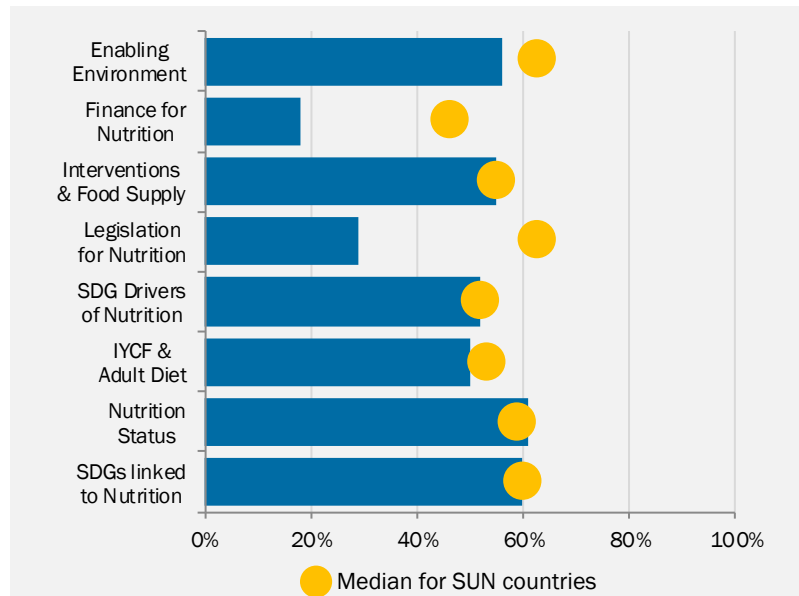

NAMIBIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Namibia are available for 66/79 (84%) indicators mostly covering the timeframe 2013-2016. Based on the data, Namibia is progressing with good performance in the uptake of breastfeeding behaviours, high impact interventions and food supply, underlying drivers of nutrition and the enabling environment (with the exception of business and civil society network functionality), as well as the nutrition status of children and women. However, more could be done for legislation (specifically the BMS Code and fortification), data availability for finance of nutrition, and addressing the high prevalence of overweight/obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
