COUNTRY DASHBOARD

Nepal

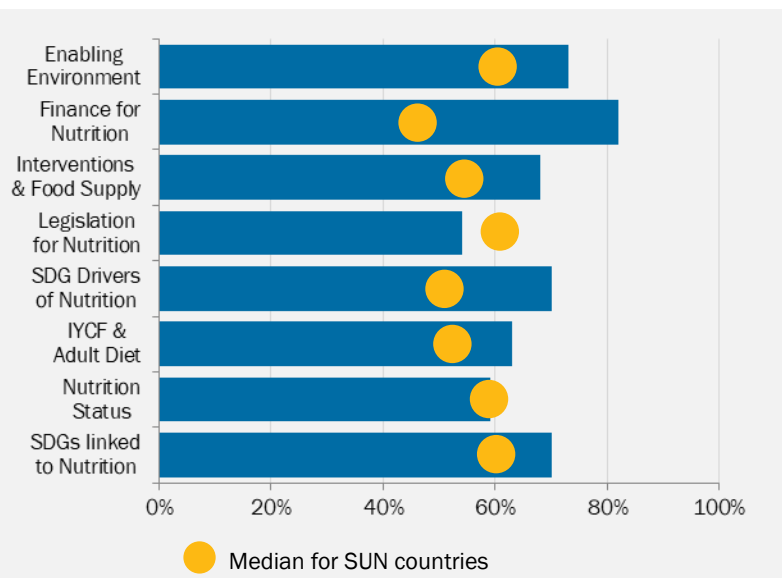

NEPAL

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Nepal are available for 75/79 (95%) indicators mostly covering the timeframe 2010-2016. Based on the data, Nepal is progressing relatively well with strong performance in the enabling environment, finance for nutrition, underlying drivers of nutrition, nutrition-related SDGs, as well as some success in the uptake of IYCF. However, more could be done for legislation particularly regarding maternity protection, right to food, and restrictions on marketing of foods and beverages to children. A high prevalence of child undernutrition (low birth weight, stunting and wasting) and anaemia and underweight among women is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
