

## COUNTRY DASHBOARD

# Nigeria

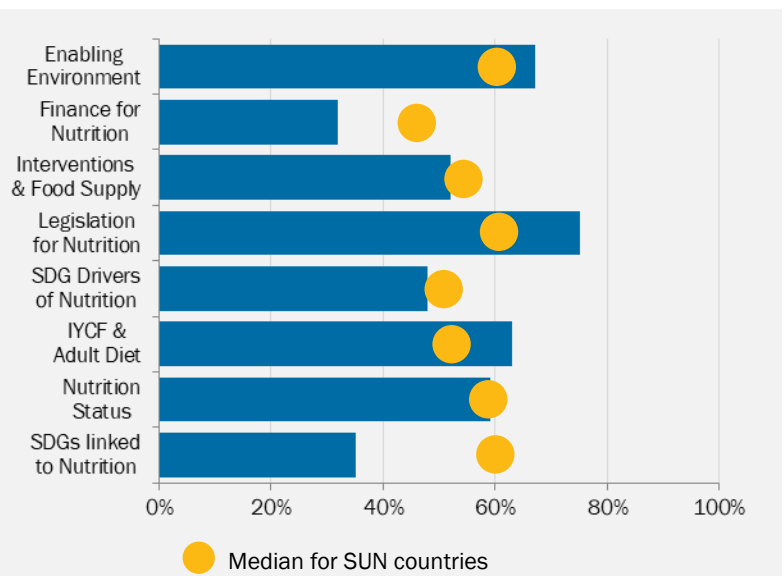

## NIGERIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Nigeria are available for 74/79 (94%) indicators mostly covering the timeframe 2011-2016. Based on the data, Nigeria is progressing relatively well with strong performance in the enabling environment and legislation for nutrition (notably regarding food fortification), and moderate performance in the uptake of dietary behaviours. However, more could be done for nutrition-related SDG's, and scaling up high impact nutrition and health interventions to address the high prevalence of child undernutrition as well as anemia, overweight, and obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
