

## COUNTRY DASHBOARD

# Pakistan

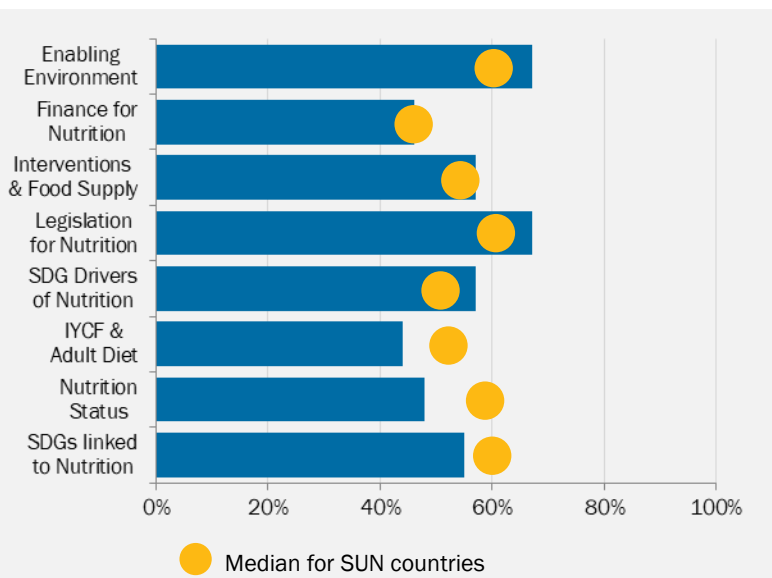

## PAKISTAN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Pakistan are available for 73/79 (92%) indicators mostly covering the timeframe 2011-2016. Based on the data, Pakistan is demonstrating good performance in the enabling environment (with noted success in UN and Business network functionality), finance for nutrition, and legislation, as well as moderate coverage of both nutrition and SDG-related interventions. However, more could be done for scaling up high-impact nutrition interventions, including young child feeding practices, to address the excessive burden of undernutrition among women and children.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
