

COUNTRY DASHBOARD

Peru

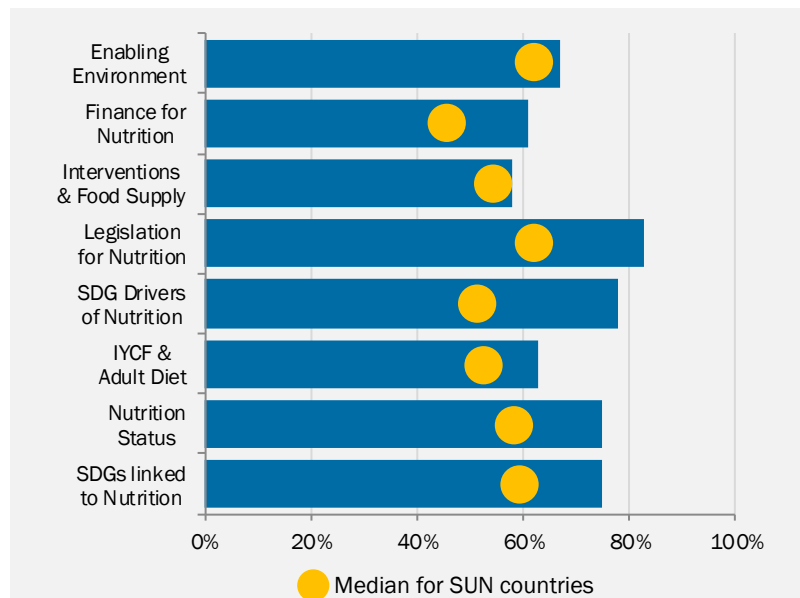

PERU

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Peru are available for 70/79 (89%) indicators mostly covering the timeframe 2012-2016. Based on the data, Peru is progressing relatively well with strong performance across most domains, especially the enabling environment, legislation, underlying drivers and IYCF and dietary intake behaviours. However, more could be done on donor finance for nutrition, and on the inclusion of NCD targets in national plans to address the high prevalence of overweight/obesity among women and adolescents and diet-related NCDs.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
