# Philippines

## PHILIPPINES

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for the Philippines are available for 73/79 (92%) indicators mostly covering the timeframe 2013-2016. Based on the data, Philippines is progressing relatively well with strong performance in the enabling environment, legislation (particularly the BMS Code and fortification) and SDG-related indicators. However, more could be done for strengthening the networks and the multi-stakeholder platform, donor finance for nutrition and scaling up high-impact nutrition-specific interventions and legislation to increase the uptake of IYCF and dietary behaviours (where issues of missing data are noted) and address the high incidence of low birth weight and child stunting as well as anaemia among pregnant women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
