

COUNTRY DASHBOARD

Sierra Leone

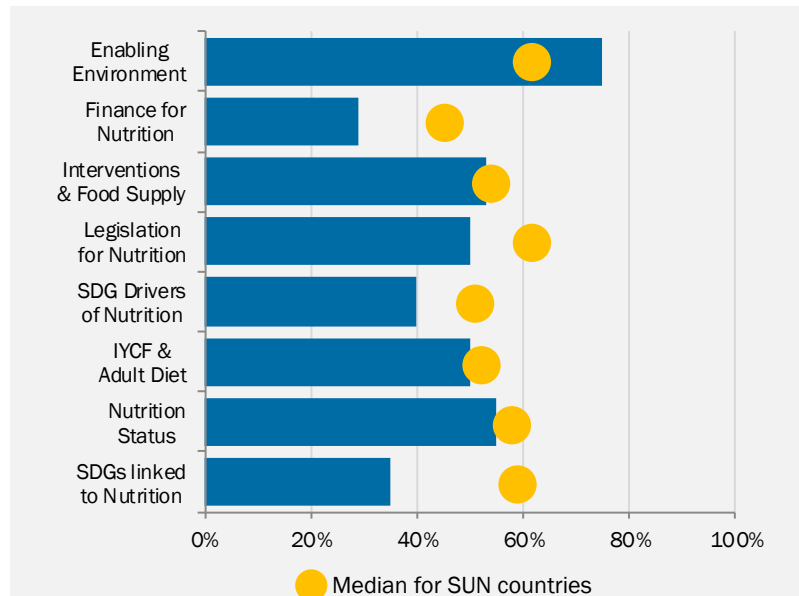

SIERRA LEONE

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Sierra Leone are available for 70/79 (99%) indicators mostly covering the timeframe 2010-2016. Based on the data, Sierra Leone is progressing relatively well with strong performance in the enabling environment and moderate performance in interventions and food supply as well as adult dietary intake behaviours. However, more could be done on finance for nutrition, nutrition-related SDG's, legislation (specifically the BMS Code and restrictions on marketing of food/beverages to children), addressing underlying drivers of nutrition such as WASH, and scaling up high impact interventions to address the high prevalence of child stunting and anemia, hypertension, overweight and obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
