

COUNTRY DASHBOARD

Sudan

SUDAN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Sudan are available for 63/79 (80%) indicators mostly covering the timeframe 2009-2016. Based on the data, Sudan has made some progress in health-based interventions, food supply and in the uptake of breastfeeding and dietary intake behaviours. However, more could be done for the enabling environment, high impact interventions, legislations, underlying drivers (especially gender) to address the high prevalence of child stunting and wasting and anaemia, diabetes and overweight/obesity among women. Also, issues of missing data is noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
