

COUNTRY DASHBOARD

Tajikistan

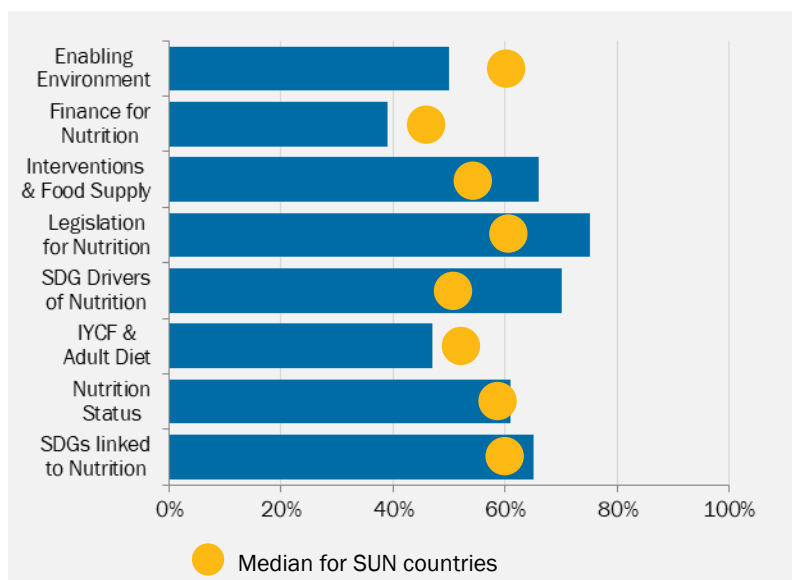

TAJIKISTAN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Tajikistan are available for 70/79 (89%) indicators mostly covering the timeframe 2011-2016. Based on the data, Tajikistan has made progress in some high impact nutrition and health interventions, legislations, underlying drivers and nutrition-related SDG's. However, more could be done for the enabling environment (particularly the networks functionality, multi-stakeholder performance and inclusion of nutrition targets in plans), finance for nutrition, expansion of food fortification and increasing the uptake of IYCF and dietary behaviours to improve the nutrition status of children and women. The high prevalence of undernourishment and double burden of underweight and overweight/obesity among women are also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
