

COUNTRY DASHBOARD

United Republic of Tanzania

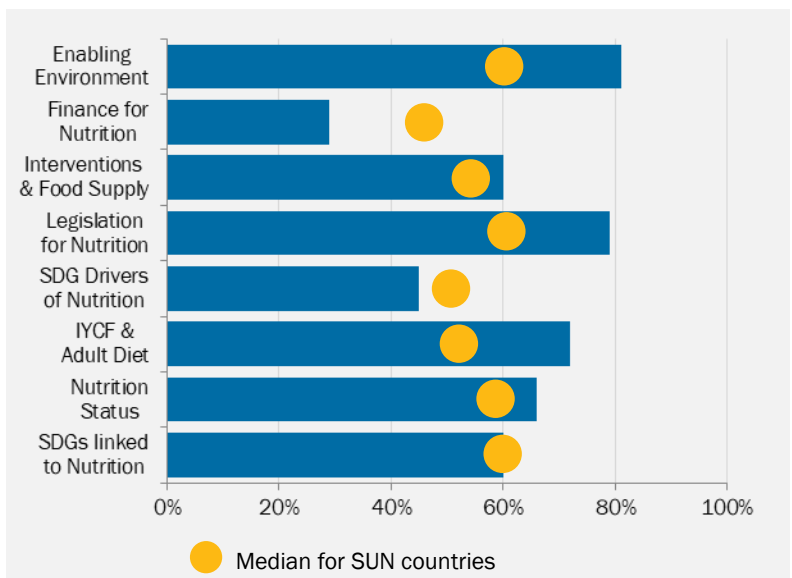

TANZANIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Tanzania are available for 71/79 (90%) indicators mostly covering the timeframe 2012-2016. Based on the data, Tanzania is progressing well in terms of the enabling environment and legislation for nutrition and performing above the SUN median in coverage of high impact interventions and breastfeeding, which is reflected in their performance in nutrition status and SDG-related outcomes. However, more could be done on coverage of underlying drivers of nutrition (especially water, sanitation and infectious diseases) and young child feeding practices to address the high prevalence of child stunting and anaemia, underweight and overweight/obesity among women. Data on government finance have just been reported.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
