

## COUNTRY DASHBOARD

# Togo

## TOGO

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Togo are available for 75/79 (95%) indicators mostly covering the timeframe 2009-2016. Based on the data, Togo is progressing with good performance in legislation for nutrition (particularly regarding maternity protection and food fortification) and the underlying drivers, as well as some progress on IYCF and dietary intake behaviours and child nutrition status. However, more could be done on finance for nutrition and scaling up high-impact nutrition interventions to address the excessive burden of malnutrition, especially anaemia and overweight/obesity, among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
