

COUNTRY DASHBOARD

Yemen

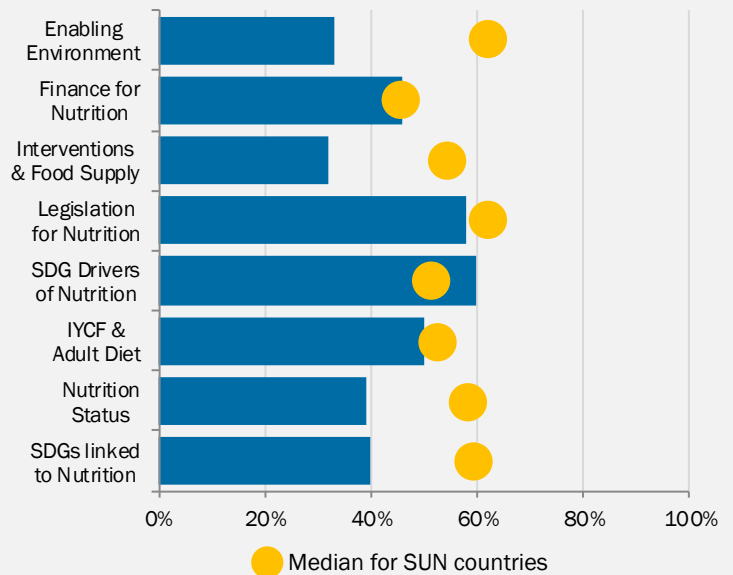

YEMEN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Yemen are available for 67/79 (85%) indicators mostly covering the timeframe 2013-2016. Based on the data, Yemen is showing good performance in finance for nutrition (particularly donor aid), legislation (notably the International Code of Marketing Breast-milk Substitutes and mandatory food fortification) and underlying drivers such as water and sanitation services. However, more could be done for the enabling environment (particularly network functionality and multi-stakeholder platform performance) and scaling up high-impact nutrition interventions and addressing gender-specific indicators (early marriage and secondary school enrollment) to tackle the high prevalence of undernutrition among children (low birthweight, stunting and wasting) and the double burden of under-nutrition and overweight/obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
