## COUNTRY DASHBOARD

# Zambia

## ZAMBIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Zambia are available for 68/79 (86%) indicators mostly covering the timeframe 2010-2016. Based on the data, Zambia is progressing relatively well with strong performance in the enabling environment and some progress on finance for nutrition, as well as uptake of breastfeeding and dietary intake behaviours. However, more could be done for underlying drivers of nutrition and scaling up high impact interventions (where missing data is noted) to address the high prevalence of child stunting, and anaemia and overweight/obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
