

COUNTRY DASHBOARD

Benin

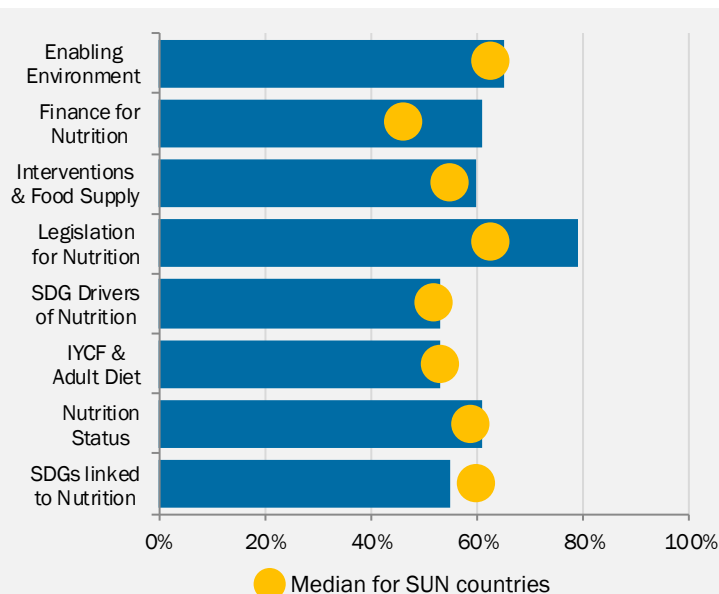

BENIN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Benin are available for 75/79 (95%) indicators mostly covering the timeframe 2011-2016. Based on the data, Benin is progressing well with strong performance in legislation and the enabling environment (with particular success noted in managing multi-stakeholder platforms), as well as good coverage of interventions and dietary intake. However, more could be done for addressing underlying drivers of nutrition, such as access to basic sanitation, and scaling up interventions to address the burden of anaemia and overweight/obesity among women. Low performance of nutrition-related SDGs is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
