

Botswana

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Botswana

Joined the SUN Movement in 2015

Population 2,292,000
(UNPD 2017)

Income class Upper middle income
(World Bank 2018)

Humanitarian risk class Low
(INFORM 2019)

Data for Botswana are available for 66/85 (78%) MEAL indicators, with most covering the timeframe 2007-2018. Based on the data, Botswana is progressing with strong performance in government spending for nutrition and moderate performance for interventions and food supply, underlying drivers of nutrition, and nutrition-related SDGs. However, more could be done for the enabling environment (especially establishing multi-stakeholder groups), food-related legislation, food security, and infant and young child feeding practices to address the double burden of child stunting and overweight and obesity among children and women. There is also a need to update national estimates of child nutritional status and fill data gaps for interventions coverage, underlying drivers, and infant and young child feeding practices.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN	
2.1 National Budget Spending for Nutrition				
A) Budget Analysis Completeness (out of 4 key elements)		4	SMS 2017	3
B) Budget spending per child U5 for nutrition-specific interventions		\$23.67	SMS 2017	\$1.56
C) Percentage budgeted for nutrition-specific spending		3.0%	SMS 2017	1.2%
2.2 Donor Funding for Nutrition				
A) Donor spending on nutrition-specific interventions per stunted child U5		\$0.49	R4D 2015-2016	\$7.81
B) Donor spending on nutrition-specific interventions per child U5		\$0.15	R4D 2015-2016	\$2.45
2.3 Agriculture Orientation Index		2.08	FAO 2016	0.22

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
