

Democratic Republic of the Congo

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

DR Congo

Joined the SUN Movement in 2013

Population 81,340,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class Very High
(INFORM 2019)

Data for DR Congo are available for 76/85 (89%) MEAL indicators, with most covering the timeframe 2013-2018. Based on the data, DR Congo is progressing with moderate performance in the enabling environment (especially regarding the UN Network and the incorporation of undernutrition in development policies), government spending for nutrition, legislation for nutrition, breastfeeding rates and nutrition-related SDGs. However, more could be done on scaling up coverage of high-impact interventions and improving young child feeding and dietary intake behaviours, as well as addressing the underlying drivers of malnutrition, to reduce the high prevalence of undernutrition and anaemia among children and women.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN
2.1 National Budget Spending for Nutrition			
A) Budget Analysis Completeness (out of 4 key elements)	4	SMS 2018	3
B) Budget spending per child U5 for nutrition-specific interventions	\$9.88	SMS 2018	\$1.13
C) Percentage budgeted for nutrition-specific spending	0.8%	SMS 2018	1.3%
2.2 Donor Funding for Nutrition			
A) Donor spending on nutrition-specific interventions per stunted child U5	\$3.45	R4D 2015-2017	\$9.02
B) Donor spending on nutrition-specific interventions per child U5	\$1.47	R4D 2015-2017	\$3.16
2.3 Agriculture Orientation Index	0.55	FAO 2017	0.19

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
