

## COUNTRY DASHBOARD

# Gambia

## GAMBIA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Gambia are available for 70/79 (89%) indicators mostly covering the timeframe 2010-2016. Based on the data, Gambia is progressing with good performance in the nutrition status of children, as well as the underlying drivers of nutrition. However, more could be done for the enabling environment (particularly regarding network functionality), finance for nutrition (where considerable missing data is identified), legislation, and scaling up high impact interventions, including food supply and the uptake of young child feeding behaviours, to address the high prevalence of child wasting and anemia, overweight and obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
