

Ghana

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Ghana

Joined the SUN Movement in 2011

Population 28,834,000
(UNPD 2017)

Income class Lower middle income
(World Bank 2019)

Humanitarian risk class Medium
(INFORM 2019)

Data for Ghana are available for 77/85 (91%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Ghana is progressing very well with strong performance in the enabling environment, legislation for nutrition (particularly the BMS Code and food fortification), and nutrition-related SDGs, as well as moderate success in the uptake of IYCF and dietary behaviours and child nutritional status. However, more could be done to track nutrition-specific allocations in government spending, improve intervention coverage and food supply, address the underlying drivers of malnutrition such as basic sanitation access, and improve young child feeding practices. A high prevalence of anemia and overweight/obesity among women is noted.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
