

Guatemala

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Guatemala

Joined the SUN Movement in 2010

Population 16,914,000
(UNPD 2017)

Income class Lower middle income
(World Bank 2019)

Humanitarian risk class High
(INFORM 2019)

Data for Guatemala are available for 78/85 (92%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Guatemala is progressing very well with strong performance across most domains, especially the enabling environment, finance for nutrition, legislation, underlying drivers and nutrition-related SDGs. However, more could be done to scale-up coverage of high-impact nutrition-specific interventions and address IYCF and dietary intake behaviours in order to reduce child stunting levels and address the growing burden of overnutrition and diet-related NCDs among women. The need for legislation on restricting marketing of foods and beverages to children is also noted.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
