

COUNTRY DASHBOARD

Kyrgyzstan

KYRGYZSTAN

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Kyrgyzstan are available for 71/79 (90%) indicators mostly covering the timeframe 2012-2016. Based on the data, Kyrgyzstan is progressing relatively well with strong performance in IYCF practices as well as underlying drivers and nutrition-related SDG's. However, more could be done on the multi-stakeholder platform performance, finance for nutrition, scaling up of high-impact interventions and food fortification to address the high prevalence of anaemia among women. The inclusion of NCD targets in national development plans and restrictions on the food and beverage marketing to children should be prioritized given the high prevalence of child overweight as well as overweight/obesity and diabetes among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators
