

COUNTRY DASHBOARD

Lao PDR

The MEAL Results Framework identifies a wide range of desired results and associated indicators of progress across various domains in which the SUN Movement seeks to catalyze change and delivery nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

LAO PDR

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Lao PDR are available for 68/79 (86%) indicators mostly covering the timeframe 2011-2016. Based on the data, Lao PDR is progressing relatively well with good performance in the enabling environment, finance for nutrition, underlying drivers of nutrition and nutrition-related SDG's. However, more could be done for legislation (particularly on food fortification and on restrictions on food and beverage marketing to children) and for scaling up interventions to address the high prevalence of child stunting and anaemia among women. Missing data related to interventions and complementary child feeding is also noted.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
