## COUNTRY DASHBOARD

# Mali

## MALI

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Mali are available for 72/79 (91%) indicators mostly covering the timeframe 2012-2016. Based on the data, Mali is progressing relatively well with strong performance in the enabling environment and legislation for nutrition (with marked successes in restricting marketing of foods for children, and fortification standards) as well as moderate performance on donor finance and some progress on intervention coverage and underlying drivers. However, more could be done for scaling up high-impact nutrition interventions and addressing early marriage and pregnancy to reduce malnutrition, especially under-5 wasting and stunting, as well as anaemia and overweight/obesity among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
