COUNTRY DASHBOARD

Rwanda

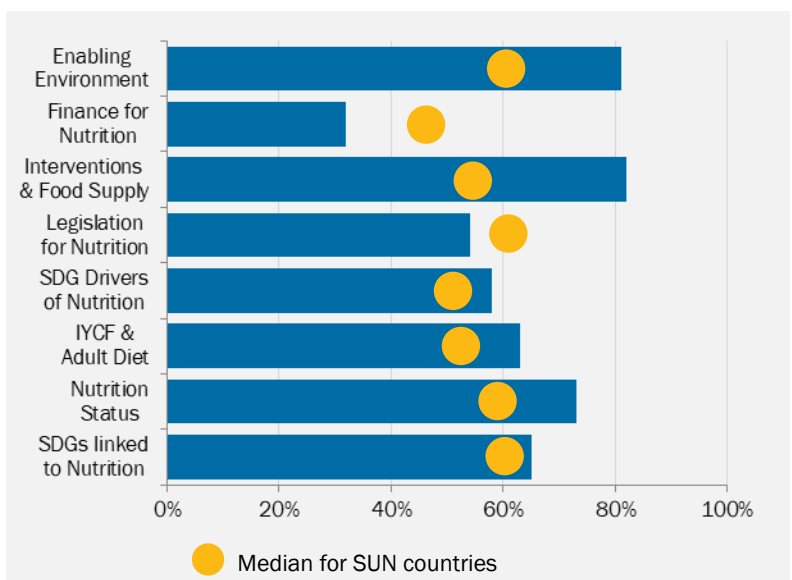

RWANDA

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Rwanda are available for 72/79 (91%) indicators mostly covering the timeframe 2010-2016. Based on the data, Rwanda is progressing well with strong performance in the enabling environment, high impact interventions and food supply, underlying drivers of nutrition, uptake of IYCF and dietary intake behaviours, as well as the nutrition status of women. However, more could be done for finance of nutrition where missing data is noted, legislation (particularly regarding restrictions on marketing of foods to children and food fortification) and reducing food insecurity and poverty to address high levels of child stunting and overweight.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
