Monitoring, Evaluation, Accountability, Learning (MEAL) 2016–2020

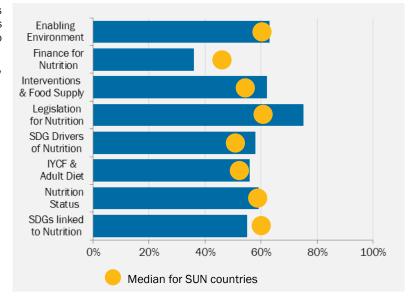

SENEGAL

The Country Dashboard provides an overview on the progress using a standard set of indicators that cover different dimensions of the SUN Movement Theory of Change, from commitments to actions to results to impacts.

Data for Senegal are available for 69/79 (87%) indicators mostly covering the timeframe 2010-2016. Based on the data, Senegal is progressing with strong performance in the enabling environment (especially related to addressing nutrition in development policies) and legislation for nutrition, as well as good performance on intervention coverage and the underlying drivers. However, more could be done on finance for nutrition, where data is missing, and IYCF and dietary intake behaviours to address the burden of malnutrition, especially among women.

This dashboard can be adapted for use at sub-national level and complemented with additional indicators based on data availability. The selected indicators are aligned with globally agreed frameworks for nutrition and with the SDGs indicators.
