

Sri Lanka

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Sri Lanka

Joined the SUN Movement in 2012

Population 20,877,000
(UNPD 2017)

Income class Upper middle income
(World Bank 2019)

Humanitarian risk class Medium
(INFORM 2019)

Data for Sri Lanka are available for 69/85 (81%) MEAL indicators, with most covering the timeframe 2016-2018. Based on the data, Sri Lanka is progressing very well with strong performance in the enabling environment, underlying drivers for nutrition, and nutrition-related SDG's as well as moderate performance on interventions and food supply, high uptake of exclusive breastfeeding and low prevalence of child stunting and overweight/obesity in both children and women. However, more could be done on food system indicators, including enactment of food-related legislation and improving fruit and vegetable availability and intake, to help reduce the high prevalence of low birthweight and wasting among children, and anaemia, underweight and diabetes among women. Missing data on finance, nutrition interventions and child feeding practices is also noted.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN
2.1 National Budget Spending for Nutrition			
A) Budget Analysis Completeness (out of 4 key elements)	No data		3
B) Budget spending per child U5 for nutrition-specific interventions	No data		\$1.13
C) Percentage budgeted for nutrition-specific spending	No data		1.3%
2.2 Donor Funding for Nutrition			
A) Donor spending on nutrition-specific interventions per stunted child U5	\$22.93	R4D 2015-2017	\$9.02
B) Donor spending on nutrition-specific interventions per child U5	\$3.97	R4D 2015-2017	\$3.16
2.3 Agriculture Orientation Index	0.69	FAO 2017	0.19

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
