

United Republic of Tanzania

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Tanzania

Joined the SUN Movement in 2011

Population 57,310,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class High
(INFORM 2019)

Data for Tanzania are available for 75/85 (88%) MEAL indicators, with most covering the timeframe 2015-2018. Based on the data, Tanzania is progressing very well, with strong performance in the enabling environment and legislation for nutrition domains, and performing above the SUN median in coverage of high impact interventions, breastfeeding and dietary intake, which is reflected in their performance in nutrition status and SDG-related outcomes. However, more could be done on government finance for nutrition (where missing data is noted), underlying drivers of nutrition (especially WASH, infectious diseases and gender-related indicators) and young child feeding practices to address the high prevalence of child stunting and anaemia and overweight/obesity among adolescent girls and women.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN
2.1 National Budget Spending for Nutrition			
A) Budget Analysis Completeness (out of 4 key elements)	No data	No data	3
B) Budget spending per child U5 for nutrition-specific interventions	No data	No data	\$1.13
C) Percentage budgeted for nutrition-specific spending	No data	No data	1.3%
2.2 Donor Funding for Nutrition			
A) Donor spending on nutrition-specific interventions per stunted child U5	\$9.88	R4D 2015-2017	\$9.02
B) Donor spending on nutrition-specific interventions per child U5	\$3.41	R4D 2015-2017	\$3.16
2.3 Agriculture Orientation Index	0.04	FAO 2015	0.19

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
