

The Gambia

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

The Gambia

Joined the SUN Movement in 2011

Population 2,101,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class Medium
(INFORM 2019)

Data for The Gambia are available for 77/85 (91%) MEAL indicators, with most covering the timeframe 2017-2018. Based on the data, Gambia is progressing well with strong performance in the enabling environment, underlying drivers of nutrition and nutrition-related SDGs domains, as well as high exclusive breastfeeding and low child stunting and overweight levels. Moderate performance in legislation (especially the enactment of the BMS Code) is also noted. However, more can be done for tracking government spending for nutrition and scaling up coverage for high-impact interventions, including food supply and the uptake of optimal young child feeding behaviours, to address the high prevalence of low birthweight and anemia, overweight and obesity among women.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN	
2.1 National Budget Spending for Nutrition				
A) Budget Analysis Completeness (out of 4 key elements)		3	SMS 2015	3
B) Budget spending per child U5 for nutrition-specific interventions		Not specified	SMS 2015	\$1.13
C) Percentage budgeted for nutrition-specific spending		Not specified	SMS 2015	1.3%
2.2 Donor Funding for Nutrition				
A) Donor spending on nutrition-specific interventions per stunted child U5		\$38.37	R4D 2015-2017	\$9.02
B) Donor spending on nutrition-specific interventions per child U5		\$9.43	R4D 2015-2017	\$3.16
2.3 Agriculture Orientation Index		No data		0.19

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
