

# Zimbabwe

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Zimbabwe

Joined the SUN Movement in 2011

**Population** 16,530,000  
(UNPD 2017)

**Income class** Lower middle income  
(World Bank 2019)

**Humanitarian risk class** High  
(INFORM 2019)

Data for Zimbabwe are available for 76/85 (89%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Zimbabwe is progressing very well with strong performance in the enabling environment, legislation for nutrition, and nutrition-related SDGs, as well as good coverage of high-impact interventions (with the exception of interventions targeting children under five), high uptake of breastfeeding, and moderate levels of undernutrition among children. However, more could be done for government investment in nutrition and scaling up a multi-sectoral approach to address the underlying drivers of nutrition and reduce the high prevalence of anaemia, overweight/obesity, diabetes and hypertension among women.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
