

# Cameroon

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Cameroon

Joined the SUN Movement in 2013

**Population** 24,054,000  
(UNPD 2017)

**Income class** Lower middle income  
(World Bank 2018)

**Humanitarian risk class** High  
(INFORM 2019)

Data for Cameroon are available for 74/85 (87%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Cameroon is making progress across most of the MEAL domains, with moderate performance in all except the enabling environment and finance for nutrition domains. More can be done to strengthen multi-stakeholder processes, integrate nutrition into national development policies, and increase funding for nutrition, as well as address underlying drivers of nutrition (especially water access, infectious diseases and gender-related drivers) and scale-up high-impact interventions and IYCF practices to address the burden of stunting among children and double burden of anaemia and overweight/obesity among women.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
