

# Chad

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Chad

Joined the SUN Movement in 2013

**Population** 14,900,000  
(UNPD 2017)

**Income class** Low income  
(World Bank 2018)

**Humanitarian risk class** Very High  
(INFORM 2019)

Data for Chad are available for 77/85 (91%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Chad has achieved some progress in terms of the enabling environment, treatment of severe acute malnutrition, iodized salt coverage, maternity protection legislation and low levels of overweight/obesity. More should be done to ensure that legislation, finance and implementation efforts are prioritized to scale up high-impact nutrition interventions and improve infant and young child feeding practices to address the excessive burden of undernutrition among women and children. A multi-sectoral approach is required to improve drivers of nutrition.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
