

Gambia

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Gambia

Joined the SUN Movement in 2011

Population 2,101,000
(UNPD 2017)

Income class Low income
(World Bank 2018)

Humanitarian risk class Medium
(INFORM 2019)

Data for Gambia are available for 76/85 (89%) MEAL indicators, with most covering the timeframe 2013-2018. Based on the data, Gambia is progressing well with strong performance in the enabling environment and nutrition-related SDGs domains, as well as moderate performance in legislation (especially the enactment of the BMS Code) and the underlying drivers of nutrition. However, more could be done for finance for nutrition (where missing data is noted) and scaling up high impact interventions, including food supply and the uptake of young child feeding behaviours, to address the high prevalence of child wasting and anemia, overweight, and obesity among women.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
