

Kyrgyzstan

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Kyrgyzstan

Income class Lower middle income

Humanitarian risk class Medium
(INFORM 2019)

Data for Kyrgyzstan are available for 77/85 (91%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Kyrgyzstan is progressing very well with strong performance in the underlying drivers and nutrition-related SDG's, as well as moderate performance on the enabling environment, legislation for nutrition, IYCF and dietary intake, and child nutritional status. However, more could be done to integrate nutrition in national development policies, increase funding for nutrition, and scale-up high-impact interventions and food fortification to address the high prevalence of anaemia among women. The inclusion of NCD targets in nutrition plans and restrictions on food and beverage marketing to children should be prioritized given the high prevalence of overweight/obesity among children and women.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
