

# Yemen

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Yemen

Joined the SUN Movement in 2012

**Population** 28,250,000  
(UNPD 2017)

**Income class** Lower middle income  
(World Bank 2018)

**Humanitarian risk class** Very High  
(INFORM 2019)

Data for Yemen are available for 67/85 (79%) MEAL indicators, with most covering the timeframe 2013-2018. Based on the data, Yemen is showing progress in building an enabling environment for nutrition, strong performance on legislation (notably the international code of breast-milk substitute marketing and food fortification) and good performance in donor finance for nutrition and underlying drivers such as basic drinking water and sanitation services. However, more could be done for network functionality, scaling up coverage of high-impact interventions (including promotion of IYCF behaviours) and address gender-specific indicators (early marriage, education) to reduce the very high prevalence of child stunting and wasting, and the double burden of anaemia and overweight/obesity among women.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
