## INSTITUTIONAL TRANSFORMATIONS 2018-2019

**2019 TOTAL WEIGHTED 63%**

<p>Progress has been made towards creating networks for universities and the private sector with opportunities to fund and support the process.</p> <p>Civil-society networks need to be expanded at the local level.</p> <p>The Italian Agency for Development Cooperation has joined the Donors Network.</p> <p>There has been support for the Parliamentarians for Nutrition Network and the prospect of support for creating a network of local elected representatives for nutrition.</p> <p>Three local civil-society platforms (in Matam, Sédhiou and Bambey) have operational action plans.</p>	<p>The process of developing national food guidelines has been started following analysis of public policies and food environments.</p> <p>Advocacy on adopting the draft decree on the marketing of breast-milk substitutes is ongoing.</p> <p>At the local level, a trial of the Guide to Local Development Planning incorporating nutrition in 25 local authorities, is in place.</p> <p>Mechanisms exist through regulatory implementation and monitoring structures in the political and legal framework. However, there are challenges in applying them due to a lack of human resources.</p>	<p>The UNDAF and donors are aligned with the priorities of the Multisectoral Strategic Plan for Nutrition (PSMN).</p> <p>The monitoring and evaluation (M&amp;E) plan for the PSMN clearly defines objectives and budgets for each strategic aim, intervention area, sector responsibility and coordination and M&amp;E mechanisms at all levels. It includes a Common Results Framework (CRF) for implementation of the PSMN.</p> <p>A national nutrition review is scheduled for 2020 as part of Senegal's economic and social policy to produce a joint vision of the nutrition situation and the implementation of initiatives.</p>	<p>Since June 2018, Senegal has had a Multisectoral Strategic Plan for Nutrition, consisting of 12 sectoral nutrition Action Plans with a budget of FCFA 206,031,256,174. However, not all funding is yet in place.</p> <p>The current study on funding for the PSMN will help to establish mechanisms for funding activities as well as defining financial reporting frameworks.</p> <p>There is an internal funding mechanism for nutrition that is essentially covered by the government, but the level of resource mobilization is still too low to respond to all needs.</p>
---	---	---	---

## 2019-2020 PRIORITIES

- Increase the level of activity on the multi-actor platform;
- Finalize studies on funding for nutrition and hold a round table with donors on funding the PSMN;
- Organize the national nutrition review;
- Create platforms for universities and the private sector;
- Embark on the process of creating an ad hoc technical committee to research determining factors for anaemia.
