

Burundi

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Burundi

Joined the SUN Movement in 2013

Population 10,864,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class High
(INFORM 2019)

Data for Burundi are available for 73/85 (86%) MEAL indicators, with most covering the timeframe 2016-2018. Based on the data, Burundi is progressing in its efforts to address high child stunting levels, with strong performance in the enabling environment and legislation (especially food fortification), as well as high breastfeeding rates and moderate levels of other forms of undernutrition. More could be done for improving inclusion of nutrition targets in national plans, increased spending for nutrition, coverage of nutrition and health interventions, and child feeding practices. Data gaps for key food system indicators are also noted.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
