

Guinea-Bissau

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Guinea-Bissau

Joined the SUN Movement in 2014

Population 1,861,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class Medium
(INFORM 2019)

Data for Guinea-Bissau are available for 71/85 (84%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Guinea-Bissau is showing good progress in the coverage of several interventions, including Vitamin A supplementation, ORS/zinc for diarrhea, and ITN use, as well as exclusive breastfeeding practices. However, more could be done to advance with the enabling environment (including the SUN processes and integration of nutrition targets in national plans), increase funding for nutrition, and address underlying drivers of nutrition including improving food supply and dietary intake in order to reduce the burden of malnutrition, in particular high prevalence of low birthweight and anaemia and overweight and obesity among women. The issue of missing data is also noted.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.

Finance for Nutrition

As multiple stakeholders mobilize resources, the results include increased spending for evidence-based high-impact nutrition actions from both national and external funding sources.

INDICATOR	SCORE	DATA SOURCE	SUN MEDIAN
2.1 National Budget Spending for Nutrition			
A) Budget Analysis Completeness (out of 4 key elements)	2	SMS 2014	3
B) Budget spending per child U5 for nutrition-specific interventions	\$0.15	SMS 2014	\$1.13
C) Percentage budgeted for nutrition-specific spending	No data	2014	1.3%
2.2 Donor Funding for Nutrition			
A) Donor spending on nutrition-specific interventions per stunted child U5	\$1.99	R4D 2015-2017	\$9.02
B) Donor spending on nutrition-specific interventions per child U5	\$0.55	R4D 2015-2017	\$3.16
2.3 Agriculture Orientation Index	0.10	FAO 2015	0.19

Interventions and Food Supply

As multiple stakeholders mobilize resources and align their actions, the results include increased coverage of nutrition actions, increased diversity and quality of food supply, and equitable geographic distribution of nationally agreed core actions and implementation capacity for nutrition.
