

# Myanmar

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Myanmar

Joined the SUN Movement in 2013

**Population** 53,371,000  
(UNPD 2017)

**Income class** Lower middle income  
(World Bank 2019)

**Humanitarian risk class** High  
(INFORM 2019)

Data for Myanmar are available for 73/85 (86%) MEAL indicators, with most covering the timeframe 2015-2018. Based on the data, Myanmar is progressing well with strong performance in the enabling environment, underlying drivers of nutrition, uptake of breastfeeding behaviours and the nutrition status of children. However, more could be done to address the issue of missing data for indicators related to government finance for nutrition, increase uptake of optimal child feeding behaviours, and enact legislation targeting food fortification as well as the recognition of the right to food in order to reduce the high prevalence of underweight and anaemia among women.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
