

# Philippines

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

## SUN MOVEMENT THEORY OF CHANGE

## Philippines

Joined the SUN Movement in 2014

**Population** 104,918,000  
(UNPD 2017)

**Income class** Lower middle income  
(World Bank 2019)

**Humanitarian risk class** High  
(INFORM 2019)

Data for Philippines are available for 76/85 (89%) MEAL indicators, with most covering the timeframe 2015-2018. Based on the data, Philippines is progressing very well with strong performance in the enabling environment, legislation (particularly the BMS Code and fortification), underlying drivers of malnutrition and nutrition-related SDGs, as well as low levels of overweight/obesity. However, more could be done to strengthen the integration of nutrition in development policies, increase donor finance for nutrition, scale-up high-impact nutrition-specific interventions and increase the uptake of optimal IYCF and dietary behaviours in its efforts to reduce the high prevalence of low birthweight, child stunting and anaemia among pregnant women.

## Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
