

Rwanda

The Scaling Up Nutrition (SUN) Movement Monitoring, Evaluation, Accountability and Learning (MEAL) System was developed for the SUN Strategy 2016-2020. It identifies a wide range of desired results and associated indicators of progress across eight domains in which the SUN Movement seeks to catalyze change and deliver nutrition impact. These results correspond to the steps in the SUN Movement Theory of Change.

The Country Dashboard provides an overview of progress using a set of indicators aligned with globally agreed frameworks for nutrition and the SDG Framework. It is designed to support SUN Movement stakeholders at all levels to assess performance and inform strategic decisions towards ending all forms of malnutrition.

SUN MOVEMENT THEORY OF CHANGE

Rwanda

Joined the SUN Movement in 2011

Population 12,208,000
(UNPD 2017)

Income class Low income
(World Bank 2019)

Humanitarian risk class Medium
(INFORM 2019)

Data for Rwanda are available for 74/85 (87%) MEAL indicators, with most covering the timeframe 2014-2018. Based on the data, Rwanda is progressing very well with strong performance in the enabling environment, high impact interventions and food supply, uptake of IYCF and dietary intake behaviours, nutrition-related SDGs and nutrition status of women, as well as moderate performance in legislation and underlying drivers of nutrition. However, more could be done for government finance for nutrition (where missing data is noted), food fortification legislation, promotion of optimal child feeding practices, and reducing food insecurity and poverty to address high levels of child stunting and adolescent overweight/obesity.

Enabling Environment

As stakeholders from different sectors come together to build an enabling environment for improving nutrition, it results in a multi-stakeholder platform, functioning networks of nutrition actors, progress in the SUN Movement processes, integration of nutrition in development plans and improved nutrition information systems.
